Apex 3-Series Wireless Headsets

Rugged and waterproof

Designed for comfort and built to withstand extreme environments, Apex 3-Series headsets are waterproof, dustproof and they float! Tested and verified from -30°C to 60°C, these rugged communicators are ready to work wherever the job takes you.

Situational Awareness

Microphones placed on the forward edge of each ear dome provide stereo listen-through, letting you hear your environment and transmitting the perception of sound in front versus sound from behind. You control listen-through volume.

Active Sound Management

The industry's first built-in sound dosimeter automatically limits high impulse noise like gunshots in Listen-Through mode. It monitors sound exposure over your work shift and automatically adjusts input levels for safety compliance.

NEW FEATURES: Now with wired auxiliary, optional wireless Bluetooth and the latest DECT7 wireless technology, Sonetics Apex 3-Series headsets are ready for any job. Wired auxiliary extends communication to any two-way radio via our PR radio interface. Wireless Bluetooth connects mobile phones and other Bluetooth devices. DECT7 wireless is the latest high-definition team communication system.

SONETICS | FIRECOM | FLIGHTCOM: Trusted and proven for over 30 years in industries like fire protection and emergency services, aviation ground support operations, manufacturing and public works.

COLOR YOUR TEAM

Apex 3-Series Wireless Headsets

PERSONAL

Listen-Through advanced hearing protectors with personal sound dosimeters shield you from dangerous noise levels while enhancing other audio to comfortable listening levels. Available with two-way radio and wireless Bluetooth® connectivity.

TEAM

DECT7 wireless technology with full-duplex communication, like a conference call, between teams working hands-free, with no wires to snag or tangle. No buttons to press to talk, no radio channels to license, just turn on and get the job done.

ENTERPRISE

Improve operating and production efficiencies quickly, with minimal downtime. Scalable DECT7 wireless systems offer powerful solutions for communication throughout large facilities, even across multiple buildings in challenging coverage areas.
